TEKLEEN EXTENDED WARRANTY TERMS:

Enrollment in the Tekleen **Protect+** program extends Tekleen's standard factory warranty on eligible filter hardware, including the filter housing, screens, valves, fittings, and mechanical internal components, from one (1) year up to three (3) years from the date of purchase. To qualify, the customer must complete and submit documented proof of scheduled preventive maintenance at 12-month and 24-month intervals using genuine Tekleen Protect+ maintenance kits.

COVERAGE SCOPE & EXCLUSIONS:

Extended warranty coverage applies exclusively to the mechanical filter body and internal assembly. The electronic controller is covered under Tekleen's standard one-year warranty only and is specifically excluded from Year 2 and Year 3 extended coverage. Standard factory exclusions apply, including normal wear and tear, chemical attack/damage, improper installation, lack of maintenance, labor, and freight costs.

Program eligibility and extended warranty coverage are subject to required preventive maintenance, verification and Tekleen's applicable warranty terms and conditions. Terms and conditions apply.
